Product comparison

Pestman fruit fly yellow sticky trap

Lure various fruit flies by special attractant, and lure other insects by yellow color.

Normal yellow sticky trap

Only lure insects by yellow color, and no effective for fruit flies.

Usage method

1. Hang them 1.0-1.5m higher above the ground in orchards, or 10-15cm higher than vegetables or flowers.
2. Hang one every 10-20 meters. In the initial stage of fruit fly activities, it is recommended to hang 30 pieces per hectare, and 70-100 pieces per hectare during mating and outbreak periods.
3. Try to hang in a cool and ventilated place, and avoid direct sunlight.
4. Please change a new one when it is fully stuck with fruit flies or other insects.
